

Attorney Docket No.: F3332(C)
Serial No.: 10/550,639
Filed: July 10, 2006
Confirmation No.: 1939

REMARKS

Applicants wish to thank the Examiner for reviewing the present patent application. Support for new claim 15 may be found on page 7, line 26 of the specification as originally filed. Support for the amendment to claim 1 may be found, for example, in Figure 2 which shows flexible pipe 22 carrying heat transfer fluid external to the freezer cabinet. The amendment to the specification corrects an inadvertent oversight. Therefore, no new matter has been added and this RCE application is filed consistent with 35 USC §132.

Applicants, again, request that all amendments be entered prior to examining this RCE application on the merits.

Prior Rejections of Record

Applicants, again, repeat that none of the references of record in any viable combination teach or suggest a display and dispensing assembly as claimed in the present invention. Particularly, the '544 reference (U.S. Patent No. 1,847,544) merely describes a storage display case suitable to freeze and maintain frozen foods at one (1) temperature. Moreover, no heat transfer fluid is passed external to the case in the '544 reference. As already made of record, the '951 reference (U.S. Patent No. 6,185,951) merely describes a temperature controlled case.

Attorney Docket No.: F3332(C)
Serial No.: 10/550,639
Filed: July 10, 2006
Confirmation No.: 1939

There is no teaching whatsoever in the references relied on by the Examiner that even remotely suggests an assembly having a housing that is cooled by fluid exiting a freezer cabinet as set forth in the claims now presented.

Applicants request that all claims of record pass to issue.

In the event the Examiner has any questions or concerns, he is kindly invited to contact the undersigned counsel at his earliest convenience.

Respectfully submitted,

Edward A. Squillante, Jr.
